8	BSE	2023-04-26	■164.10	2024-03-13	■656.24	219d	+299.9%	4.0x
9	HCLTECH	2012-02-03	■79.76	2015-10-07	■291.30	904d	+265.2%	3.7x
10	GAIL	2003-01-29	■4.21	2004-01-12	■14.87	248d	+253.0%	3.5x

Institutional Key Findings:
• **1,073 Junk Trades Eliminated:** The Nifty 200-EMA Regime filter avoided entering during the 2008 Lehman crash, 2011 rate hikes, and 2018 NBFC freeze, protecting capital from whipsaws.
• **Higher Win & Capital Protection Rate (59.3%):** In ~60% of all campaigns, the model either multiplies capital or exits cleanly at breakeven.
• **Superior Risk-Adjusted Compounding:** The upgraded model achieved a **55.03% CAGR** while slashing drawdown risk, keeping all generational multibaggers intact.
