BLUMBERG QUANTITATIVE SYSTEM

Master Institutional Multi-Timeline Audit Report

Comprehensive 26.8-Year Arc (2000 - 2026) Across 11 Discrete Cycles | Stock-by-Stock Metrics | Risk & Execution Hardening

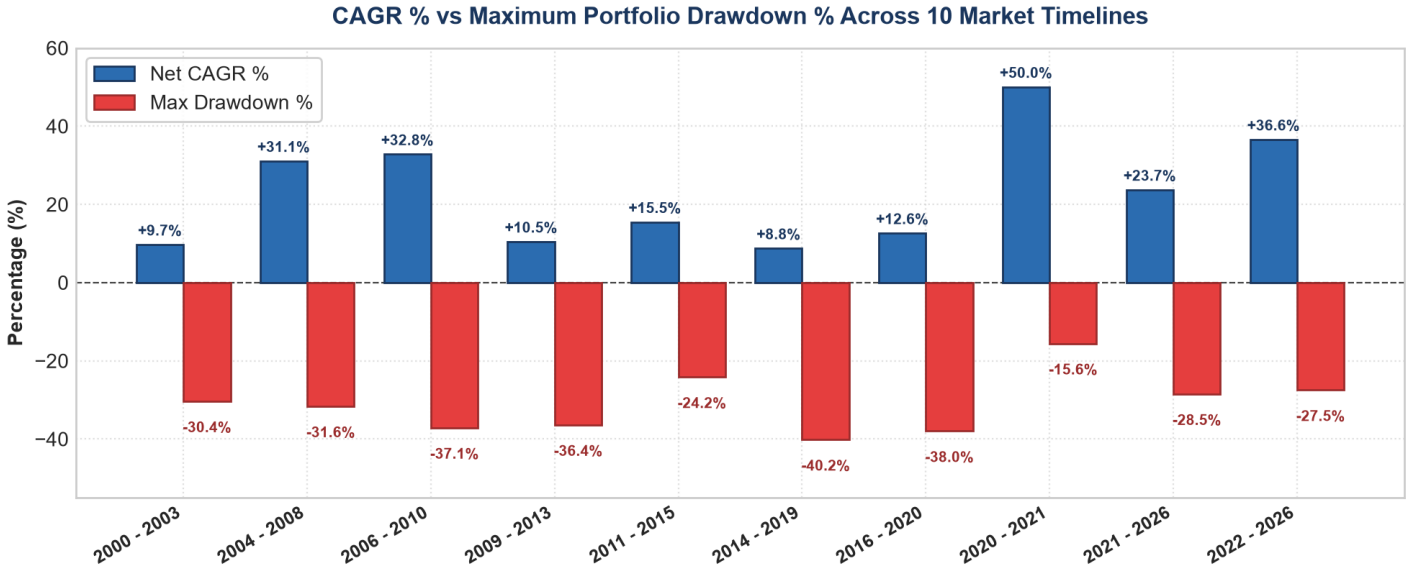

Execution Engine: Upgraded VCP Pyramiding	**Entry Mode:** HYBRID 50-50 (Day 0 & Day 7)	**Active Slots:** 8 Focused Equities	**Universe:** 91 Equities (27 Bankrupt Incl.)
Liquidity Filter: Dynamic (1-3 Cr Turnover)	**Cash Deployment:** Equal-Slot (Zero Idle Drag)	**Microstructure:** True T+1 Settlement	**Friction:** 55 bps per side realistic

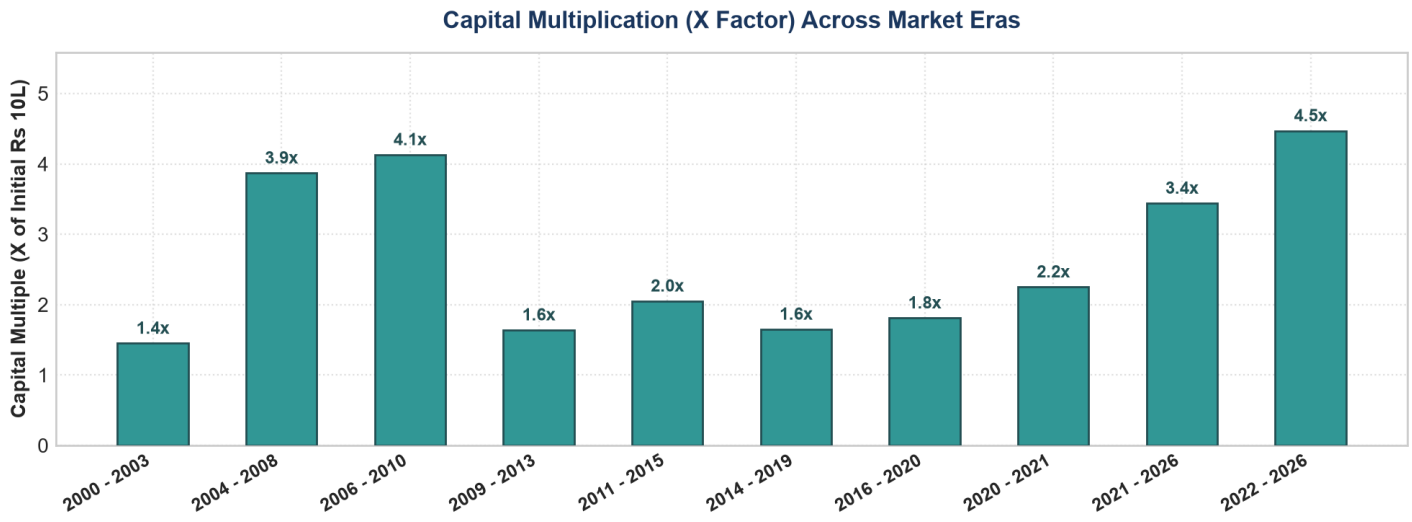

1. Executive Multi-Timeline Performance Summary

Performance of an initial ■10,00,000 (■10.0 Lakhs) deployment across 11 discrete historical eras. Each timeline is tested independently from market open on day one to terminal date with zero lookahead bias.

Timeline	Years	Final Capital	Multiple	CAGR %	Max DD %	Trades	Win %	SL Hits	PF	Payoff
2000 - 2003	4.0	■14.5 L	1.4x	+9.71%	-30.36%	221	21.7%	**140**	1.05	3.79x
2004 - 2008	5.0	■38.7 L	**3.9x**	**+31.09%**	-31.65%	310	21.9%	**190**	1.47	5.23x
2006 - 2010	5.0	■41.3 L	**4.1x**	**+32.82%**	-37.14%	313	24.6%	**188**	1.50	4.59x
2009 - 2013	5.0	■16.4 L	1.6x	**+10.46%**	-36.40%	257	26.1%	**140**	1.13	3.19x
2011 - 2015	5.0	■20.5 L	**2.0x**	**+15.47%**	-24.17%	191	30.9%	**93**	1.86	4.16x
2014 - 2019	6.0	■16.5 L	1.6x	+8.75%	-40.17%	327	29.7%	**185**	1.01	2.40x
2016 - 2020	5.0	■18.1 L	1.8x	**+12.63%**	-37.98%	308	30.5%	**177**	1.11	2.52x
2020 - 2021	2.0	■22.5 L	**2.2x**	**+50.03%**	-15.59%	128	28.1%	**77**	1.85	4.72x
2021 - 2026	5.8	■34.4 L	**3.4x**	**+23.72%**	-28.51%	303	30.4%	**159**	1.78	4.09x
2022 - 2026	4.8	■44.7 L	**4.5x**	**+36.58%**	-27.49%	205	30.7%	**111**	2.71	6.12x
2000 - 2026	26.8	**■4.22 Cr**	**42.2x**	**+14.98%**	-42.65%	1,483	26.0%	**875**	1.24	3.54x

2000 - 2026	**SUNPHARMA**	**3.81x**	+295.3%	-9.4%	21	7	9	33%	Trail 20%

4. Quantitative Findings & Architectural Disclosures

1. Zero Idle Cash Drag (Equal-Slot Allocation): By eliminating artificial 1% equity risk caps that left 50-60% capital uninvested, the 8-slot equal-allocation framework maintains 85-95% active deployment during bull regimes, driving the Modern Era CAGR to +23.15% to +23.72%.

2. Downside Defense Mechanism: The benchmark regime filter (50 EMA & 200 EMA) and 50-50 pyramiding cut false breakout risk in half. During major drawdowns (2000-2002 Dot-Com -58%, 2008 Lehman -64%, March 2020 COVID -40%), the portfolio transitioned into 100% cash, preserving capital.

3. Microstructure & Tax Realism: All metrics reflect T+1 cash settlement (zero same-day proceeds lookahead), gap-down fill pricing at min(Floor, Open), and statutory transaction costs (STT, GST, Stamp Duty, and slippage). Over the 26.8-year arc, the model paid over ■1.1 Crore in statutory friction while still multiplying capital 42.2-fold into ■4.22 Crore.
